Brainstorm & Idea Prioritization Template:

Brainstorming is a collaborative approach that allows team members to freely express and exchange ideas without immediate judgment. It encourages creativity by welcoming innovative and unconventional suggestions while promoting active participation from everyone involved. During this process, the emphasis is placed on generating a wide range of ideas rather than evaluating their quality at the beginning. These ideas are then discussed, refined, and organized collectively, enabling the team to identify practical and effective solutions for the selected problem.

Step-1: Team Gathering, Collaboration and Select the Problem Statement
