

Project Design Phase-II

Data Flow Diagram & User Stories

Date	12 July 2026
Team ID	SWTID-2026-6951
Project Name	Visualization tool for electric vehicle charge and range analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example:

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
-----------	-------------------------------	-------------------	-------------------	---------------------	----------	---------

EV User	Dashboard	USN-1	As a user, I can open the EV dashboard and view overall EV	Dashboard displays all charts and KPIs successfully.	High	Sprint-1
User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
			market insights.			
EV User	Vehicle Information	USN-2	As a user, I can view different EV brands, prices, top speed, and efficiency.	Vehicle information is displayed correctly.	High	Sprint-1
EV User	Apply Filters	USN-3	As a user, I can filter the dashboard by brand, body style, and powertrain type.	All visualizations update based on selected filters.	High	Sprint-1
EV User	Charging Station Map	USN-4	As a user, I can view charging stations across different regions of India	Charging station map loads correctly with regional data.	Medium	Sprint-2
EV User	Dashboard Insights	USN-5	As a user, I can compare EV performance using interactive dashboards.	Dashboard provides meaningful comparisons and insights.	High	Sprint-2
Data Analyst	Dataset Management	USN-6	As an analyst, I can update EV datasets whenever new information is available.	Updated data is reflected in Tableau after refresh.	Medium	Sprint-2

Administrator	Data Maintenance	USN-7	As an administrator, I can maintain and validate the EV datasets stored in MySQL.	Database remains updated and error-free.	Low	Sprint-2
